Hydrocarbon Processing®

ANNUAL EDITORIAL INDEX 1997

VOLUME 76, Nos. 1–12

A

ABSORPTION

Minimize capital investment for refinery revamps ..... Jan. 103
Improve sulfur unit reliability ..... Aug. 79
Does your distillation simulation reflect the real world? ..... Aug. 103
Understand real-world problems of vacuum ejector performance ..... Nov. 63
Deep cut vacuum tower processing provides major incentives ..... Nov. 83

ACID GASES

Improve operations and enhance refinery sulfur recovery ..... Apr. 57
Analyze trace sulfur compounds in hydrocarbon gas streams ..... Apr. 73
Improve sulfur unit reliability ..... Aug. 79
How to select gas-phase filters ..... Oct. 87
Why caustic addition is bad for amine systems ..... Oct. 115

ACIDS/SALTS

Petrochemical Processes '97 ..... Mar. 103
Control corrosion in washwater systems ..... Jun. 87
Make boiler feedwater with lower risks ..... Aug. 57

ADDITIVES

Making 'premium' diesel fuel ..... Feb. 63

ALCOHOLS

Petrochemical Processes '97 ..... Mar. 103

ALDEHYDES

Petrochemical Processes '97 ..... Mar. 103

ALKANES

What are future petrochemical feedstocks? ..... May 85

ALKYLATION

New refinery stream profiles available ..... Aug. 63

AMINES

Improve operations and enhance refinery sulfur recovery ..... Apr. 57
Effect of heat stable salts on MDEA solution corrosivity, Part 2 ..... Apr. 65
Improve sulfur unit reliability ..... Aug. 79
Why caustic addition is bad for amine systems ..... Oct. 115

ANTIKNOCK RATING

Estimate octane numbers using an enhanced method ..... Mar. 65
Economics of blend giveaway ..... Nov. 55

AROMATICS

Estimate octane numbers using an enhanced method ..... Mar. 65
Assess hydrocracker performance using a short-cut method ..... Mar. 79
Petrochemical Processes '97 ..... Mar. 103
Improve VOC emission predictions ..... Apr. 119
What are future petrochemical feedstocks? ..... May 85
Generate more revenues from pygas recovery ..... Jun. 73
Improve flare management ..... Jul. 105
New refinery stream profiles available ..... Aug. 63

B

BLENDING

Economics of blend giveaway ..... Nov. 55

C

CATALYSTS

Trends in catalysis research to meet future refining needs ..... Feb. 45
Refiner options for converting and utilizing heavy fuel oil ..... Feb. 57
Improve operations and enhance refinery sulfur recovery ..... Apr. 57

CATALYTIC CRACKING

Economically recover olefins from FCC offgases ..... Apr. 83
New refinery stream profiles available ..... Aug. 63
Refining in the Former Soviet Union ..... Aug. 67

CAUSTIC

Why caustic addition is bad for amine systems ..... Oct. 115

CETANE RATING

Making 'premium' diesel fuel ..... Feb. 63

CHLORIDES

Petrochemical Processes '97 ..... Mar. 103

COKING

Reduce the impact of coke fines on delayed cokers ..... Aug. 111
Improve alloy selection for ammonia furnaces ..... Oct. 93

COMPRESSORS

Better reciprocating compressor capacity control ..... Feb. 79
Turbogear bearing analysis ..... Apr. 93
Consider multishaft compressors for hazardous applications ..... Jul. 65

COMPUTERS

Use software to power-up analyzers ..... Jan. 83
Innovative ideas at work: leveraging best practices ..... Feb. 149
Multivariable controller increased MTBE complex capacity ..... Mar. 53
Estimate octane numbers using an enhanced method ..... Mar. 65
Controlling fired heaters ..... Apr. 103
Improve global competitiveness with supply-chain management ..... May 97
Integrated terminal operations improves profitability ..... May 101
Online optimization: what, where and estimating ROI ..... Jun. 43
Develop LP models using a steady-state simulator ..... Jun. 81
Applications and limitations of CFD in the HPI ..... Jul. 53
Design pyrolysis heaters using CFD models ..... Jul. 79
Online data reconciliation and error detection ..... Jul. 101
Implementing reformer advanced control on PC platforms ..... Aug. 91
Does your distillation simulation reflect the real world? ..... Aug. 103
How to evaluate environmental software ..... Sep. 69
Advanced control and information systems '97 ..... Sep. 87
Equipment health management program improves plant reliability ..... Oct. 61
Use dynamic modeling to improve training programs ..... Oct. 65

APC improves TA/PTA plant profits . . . Oct. 99
Integrate empirical and physical modeling . . . Oct. 105
Decision-making and modeling in petroleum refining . . . Nov. 77
Combinatorial optimization maximizes profits . . . Nov. 103
Achieve sustained business benefits from rigorous offline process models . . . Dec. 57
Latest advances in 3-D plant engineering software . . . Dec. 63
Petroleum chain integration . . . Dec. 67
Barrel calorimeters and computer solve boiler circulation problem . . . Dec. 79

CONSTRUCTION

Plan ahead for a smooth project hand over to operations . . . Jan. 135
Successfully transfer HPI proprietary technology . . . Feb. 91
HPI Construction Boxscore Update, February . . . Feb. 103
Inherently safer design principles are proven in expansions . . . Apr. 122
Reduce automation costs in today's HPI facility . . . May 178
HPI Construction Boxscore Update, June . . . Jun. 113
Pros and cons of using a PMC . . . Aug. 102-C
Practicing ergonomics in the plant . . . Aug. 125
Cost estimating made simple . . . Sep. 168-C
Teamwork increases fractionation capacity cost-effectively . . . Oct. 121
Yukong sets benchmarks for best practices . . . Oct. 126-C
Hydrocarbon value chain: now electricity . . . Nov. 118-C
Monitor contractor performance . . . Nov. 137
Consider a technology resource group for successful project execution . . . Dec. 100

CONTRACTS/AGREEMENTS

Plan ahead for a smooth project hand over to operations . . . Jan. 135
Monitor contractor performance . . . Nov. 137
Engineering standards and EQC—why bother? . . . Dec. 44

CORROSION

Effect of heat stable salts on MDEA solution corrosivity, Part 2 . . . Apr. 65
Control corrosion in washwater systems . . . Jun. 87
Designing and maintaining plant piping and valve systems . . . Jul. 59
Prevent piping failures . . . Oct. 47
How to select gas-phase filters . . . Oct. 87
Why caustic addition is bad for amine systems . . . Oct. 115

COSTS

Use software to power-up analyzers . . . Jan. 83
Improve online freeze and cloud point control . . . Jan. 95
Industrial property: a valuable weapon . . . Jan. 102-G
Minimize capital investment for refinery revamps . . . Jan. 103
Kuwait: A country and a corporation . . . Feb. 84-C
Successfully transfer HPI proprietary technology . . . Feb. 91
Petrochemical Processes '97 . . . Mar. 103
Future consumption of thermoplastics . . Apr. 118-C
Methanol: a global chemical undergoing phenomenal change . . . May 11-I
What are future petrochemical feedstocks? . . . May 85
Improve global competitiveness with supply-chain management . . . May 97
Structure better engineering specs . . . Jul. 121
Make boiler feedwater with lower risks . . . Aug. 57
Refining in the Former Soviet Union . . . Aug. 67
Do your environmental practices offer a payback? . . . Aug. 85
Outsource water/wastewater management . . . Aug. 87
Practicing ergonomics in the plant . . . Aug. 125
Cost estimating made simple . . . Sep. 168-C
Develop optimal asset utilization . . . Sep. 177
Equipment health management program improves plant reliability . . . Oct. 61
Teamwork increases fractionation capacity cost-effectively . . . Oct. 121
Yukong sets benchmarks for best practices . . . Oct. 126-C
Economics of blend giveaway . . . Nov. 55
Monitor contractor performance . . . Nov. 137
Engineering standards and EQC—why bother? . . . Dec. 44
Total quality management . . . Dec. 53
Achieve sustained business benefits from rigorous offline process models . . . Dec. 57
Latest advances in 3-D plant engineering software . . . Dec. 63
Consider a technology resource group for successful project execution . . . Dec. 100

CRACKING/CHEMICAL

Develop LP models using a steady-state simulator . . . Jun. 81

CRUDE OILS

Refiner options for converting and utilizing heavy fuel oil . . . Feb. 57
Prevent preflash drum foaming . . . May 141
New refinery stream profiles available . . . Aug. 63
Refining in the Former Soviet Union . . . Aug. 67
Improve aboveground storage tank management . . . Oct. 77

CYCLO-COMPOUND

Petrochemical Processes '97 . . . Mar. 103

D

DESULFURIZATION

New refinery stream profiles available . . . Aug. 63
Improve sulfur unit reliability . . . Aug. 79

DISTILLATION

Minimize capital investment for refinery revamps . . . Jan. 103
Generate more revenues from pygas recovery . . . Jun. 73
New refinery stream profiles available . . . Aug. 63
Does your distillation simulation reflect the real world? . . . Aug. 103
Understand real-world problems of vacuum ejector performance . . . Nov. 63
Deep cut vacuum tower processing provides major incentives . . . Nov. 83

E

ENVIRONMENT

Use software to power-up analyzers . . . Jan. 83
What is the total cost for emissions monitoring? . . . Jan. 99
Minimize environmental impacts when replacing underground pipe . . . Feb. 85
Successfully transfer HPI proprietary technology . . . Feb. 91
Improve VOC emission predictions . . . Apr. 119
ISO 14000: What you need to know . . . Apr. 133
Reduce storage tank emissions . . . May 121
Optimize wastewater operations . . . Jun. 77
Control corrosion in washwater systems . . . Jun. 87
Control valve fugitive emissions . . . Aug. 45

Pump seal standard API 682 has deficiencies . . . Aug. 49
Make boiler feedwater with lower risks . . . Aug. 57
New refinery stream profiles available . . Aug. 63
Refining in the Former Soviet Union . . . . Aug. 67
Use ISO-14000 as a compliance and productivity tool . . . Aug. 75
Improve sulfur unit reliability . . . Aug. 79
Do your environmental practices offer a payback? . . . Aug. 85
Outsource water/wastewater management . . . Aug. 87
Practicing ergonomics in the plant . . . Aug. 125
How to evaluate environmental software . . . Sep. 69
Equipment health management program improves plant reliability . . . . Oct. 61
What is your corporate perspective on loss prevention? . . . Oct. 69
Fire-safe packing curbs emissions . . . . . Oct. 83
How to select gas-phase filters . . . . . Oct. 87
Use ISO 14001 as a manager for process risks . . . Nov. 109

F

FUELS

Improve online freeze and cloud point control . . . Jan. 95
Methanol: a global chemical undergoing phenomenal change . . . May 11-I
Improve aboveground storage tank management . . . Oct. 77

H

HEAT TRANSFER

Minimize capital investment for refinery revamps . . . Jan. 103
Ceramic coat furnace tubes for improved operations . . . Jan. 115
Avoid operating problems in air-cooled heat exchangers . . . Mar. 69
Controlling fired heaters . . . Apr. 103
Prevent preflash drum foaming . . . May 141
Lessons learned from troubleshooting steam generators . . . May 155
Minimize FCCU startup problems . . . Jun. 67
Optimize fired heater operations to save money . . . Jun. 97
Applications and limitations of CFD in the HPI . . . Jul. 53
Design pyrolysis heaters using CFD models . . . Jul. 79
Understand the basics of packaged steam generators . . . Jul. 85
Consider trigeneration techniques for process plants . . . Jul. 91
Make boiler feedwater with lower risks . . . Aug. 57
Refining in the Former Soviet Union . . . . Aug. 67
Evaluating heat tracing . . . Sep. 75
Improve alloy selection for ammonia furnaces . . . Oct. 93
Understand real-world problems of vacuum ejector performance . . . Nov. 63
Throughput enhancement & process tube temperature stabilization . . . Nov. 91
Barrel calorimeters and computer solve boiler circulation problem . . . Dec. 79

HYDROCRACKING

Assess hydrocracker performance using a short-cut method . . . Mar. 79
Develop LP models using a steady-state simulator . . . Jun. 81
New refinery stream profiles available . . . Aug. 63

HYDROGEN

Assess hydrocracker performance using a short-cut method . . . Mar. 79

HYDROTREATING

Refiner options for converting and utilizing heavy fuel oil . . . Feb. 57

I

INSTRUMENTATION

Use software to power-up analyzers . . . Jan. 83
Improve online freeze and cloud point control . . . Jan. 95
What is the total cost for emissions monitoring? . . . Jan. 99
Better reciprocating compressor capacity control . . . Feb. 79
Multivariable controller increased MTBE complex capacity . . . Mar. 53
Analyze trace sulfur compounds in hydrocarbon gas streams . . . Apr. 73
Controlling fired heaters . . . Apr. 103
Inherently safer design principles are proven in expansions . . . Apr. 122
Integrated terminal operations improves profitability . . . May 101
Reduce storage tank emissions . . . May 121
Control systems upgrade: a users perspective . . . May 131
Online optimization: what, where and estimating ROI . . . Jun. 43
How control valves impact process optimization . . . Jun. 53
Minimize FCCU startup problems . . . Jun. 67
Optimize fired heater operations to save money . . . Jun. 97
Wanted: a few good technologies . . . Jun. 143
Using mass meters for liquid measurement . . . Jul. 73
Online data reconciliation and error detection . . . Jul. 101
Control valve fugitive emissions . . . Aug. 45
Refining in the Former Soviet Union . . . . Aug. 67
Implementing reformer advanced control on PC platforms . . . Aug. 91
Applying FT-IR in chemical cleaning . . . . Aug. 97
Advanced control and information systems '97 . . . Sep. 87
Equipment health management program improves plant reliability . . . . Oct. 61
Use dynamic modeling to improve training programs . . . Oct. 65
What is your corporate perspective on loss prevention? . . . Oct. 69
Improve aboveground storage tank management . . . Oct. 77
How to select gas-phase filters . . . . . Oct. 87
APC improves TA/PTA plant profits . . . . . Oct. 99
Integrate empirical and physical modeling . . . Oct. 105
Latest advances in 3-D plant engineering software . . . Dec. 63
Petroleum chain integration . . . Dec. 67

INVENTORIES

Improve global competitiveness with supply-chain management . . . . . May 97
Integrated terminal operations improves profitability . . . May 101
Improve aboveground storage tank management . . . Oct. 77

L

LEGISLATION

What is the total cost for emissions monitoring? . . . Jan. 99
Industrial property: a valuable weapon . . . Jan. 102-G
Minimize environmental impacts when replacing underground pipe . . . Feb. 85
Legal systems and multinational business . . . Mar 181
Improve VOC emission predictions . . . Apr. 119
Optimize wastewater operations . . . . . Jun. 77
Structure better engineering specs . . . Jul. 121
Make boiler feedwater with lower risks . . . Aug. 57
Use ISO-14000 as a compliance and productivity tool . . . Aug. 75
Improve sulfur unit reliability . . . Aug. 79
Practicing ergonomics in the plant . . . . . Aug. 125

How to evaluate environmental software ..... Sep. 69
What is your corporate perspective on loss prevention? ..... Oct. 69
Use ISO 14001 as a manager for process risks ..... Nov. 109
Engineering standards and EQC—why bother? ..... Dec. 44

LIQUEFIED NATURAL GAS (LNG)

What are future petrochemical feedstocks? ..... May 85

LIQUEFIED PETROLEUM GAS (LPG)

How will Southeast Asian petrochemicals impact the HPI? ..... May 91
Treat LPGs with amines ..... Sep. 49

LOSS PREVENTION

Use software to power-up analyzers .... Jan. 83
Minimize environmental impacts when replacing underground pipe .... Feb. 85
Successfully transfer HPI proprietary technology ..... Feb. 91
Improve VOC emission predictions ..... Apr. 119
Inherently safer design principles are proven in expansions ..... Apr. 122
Reduce storage tank emissions ..... May 121
Lessons learned from troubleshooting steam generators ..... May 155
Use reliability, availability and maintainability techniques ..... Jun. 63
Minimize FCCU startup problems ..... Jun. 67
Optimize wastewater operations ..... Jun. 77
Control corrosion in washwater systems ..... Jun. 87
Optimize fired heater operations to save money ..... Jun. 97
Designing and maintaining plant piping and valve systems ..... Jul. 59
Improve flare management ..... Jul. 105
Control valve fugitive emissions ..... Aug. 45
Pump seal standard API 682 has deficiencies ..... Aug. 49
Make boiler feedwater with lower risks ..... Aug. 57
Refining in the Former Soviet Union .... Aug. 67
Improve sulfur unit reliability ..... Aug. 79
Do your environmental practices offer a payback? ..... Aug. 85
Outsource water/wastewater management ..... Aug. 87
Reduce the impact of coke fines on delayed cokers ..... Aug. 111
Practicing ergonomics in the plant ..... Aug. 125
Solve nonlinear algebraic equations .... Sep. 61
Prevent piping failures ..... Oct. 47
Equipment health management program improves plant reliability .... Oct. 61
Use dynamic modeling to improve training programs ..... Oct. 65
What is your corporate perspective on loss prevention? ..... Oct. 69
Improve aboveground storage tank management ..... Oct. 77
Fire-safe packing curbs emissions ..... Oct. 83
How to select gas-phase filters ..... Oct. 87
Improve alloy selection for ammonia furnaces ..... Oct. 93
Use ISO 14001 as a manager for process risks ..... Nov. 109
Consider two-phase relief for liquid blockage of flash drums ..... Dec. 76

M

MAINTENANCE

Experience with pump gas seals ..... Jan. 47
Manage equipment failure investigation ..... Jan. 53
Detect corrosion under insulation ..... Jan. 61
Reduce turnaround costs ..... Jan. 67
Reliability and maintenance strategy to drive business performance ..... Jan. 77
Improve online freeze and cloud point control ..... Jan. 95
Minimize capital investment for refinery revamps ..... Jan. 103
Solve valve noise and cavitation problems ..... Mar. 45
Turbogear bearing analysis ..... Apr. 93
Reduce automation costs in today's HPI facility ..... May 178
Use reliability, availability and maintainability techniques ..... Jun. 63
Minimize FCCU startup problems ..... Jun. 67
Designing and maintaining plant piping and valve systems ..... Jul. 59
Control valve fugitive emissions ..... Aug. 45
Improve sulfur unit reliability ..... Aug. 79
Applying FT-IR in chemical cleaning ..... Aug. 97
Prevent piping failures ..... Oct. 47

MANAGEMENT

Manage equipment failure investigation ..... Jan. 53
Reliability and maintenance strategy to drive business performance ..... Jan. 77
Improve online freeze and cloud point control ..... Jan. 95
Industrial property: a valuable weapon ..... Jan. 102-G
Plan ahead for a smooth project hand over to operations ..... Jan. 135
Kuwait: A country and a corporation ..... Feb. 84-C
Innovative ideas at work: leveraging best practices ..... Feb. 149
Manage consultants better ..... Mar. 84-C
Legal systems and multinational business ..... Mar. 181
ISO 14000: What you need to know .... Apr. 133
Polyolefins review 1997 ..... May 3-I
A view of ACHEMA '97 conference ..... May 53
The petrochemical/chemical industry, by country ..... May 55
Improve global competitiveness with supply-chain management ..... May 97
Improve logistics to reduce distribution costs ..... May 113
Reduce automation costs in today's HPI facility ..... May 178
Online optimization: what, where and estimating ROI ..... Jun. 43
Competitiveness, DCS and management of control projects ..... Jun. 110-C
Wanted: a few good technologies ..... Jun. 143
What changes will the oil industry face? ..... Jul. 100-C
Structure better engineering specs .... Jul. 121
A quantitative approach to quality ..... Jul. 127
Use ISO-14000 as a compliance and productivity tool ..... Aug. 75
Do your environmental practices offer a payback? ..... Aug. 85
Outsource water/wastewater management ..... Aug. 87
Pros and cons of using a PMC ..... Aug. 102-C
Practicing ergonomics in the plant ..... Aug. 125
Cost estimating made simple ..... Sep. 168-C
Develop optimal asset utilization ..... Sep. 177
Teamwork increases fractionation capacity cost-effectively ..... Oct. 121
Yukong sets benchmarks for best practices ..... Oct. 126-C
Hydrocarbon value chain: now electricity ..... Nov. 118-C
Monitor contractor performance ..... Nov. 137
Engineering standards and EQC—why bother? ..... Dec. 44
Total quality management ..... Dec. 53
Achieve sustained business benefits from rigorous offline process models ..... Dec. 57
Latest advances in 3-D plant engineering software ..... Dec. 63
Petroleum chain integration ..... Dec. 67
Consider a technology resource group for successful project execution ..... Dec. 100

MATERIALS HANDLING

Improve flare management ..... Jul. 105

Practicing ergonomics in the plant ..... Aug. 125

METALS

Prevent piping failures ..... Oct. 47
Improve alloy selection for ammonia furnaces ..... Oct. 93

MOTORS

Turbogear bearing analysis ..... Apr. 93

N

NAPHTHA

What are future petrochemical feedstocks? ..... May 85
How will Southeast Asian petrochemicals impact the HPI? ..... May 91

NITROGEN AND ITS COMPOUNDS

Petrochemical Processes '97 ..... Mar. 103

O

OLEFINS

Petrochemical Processes '97 ..... Mar. 103
Economically recover olefins from FCC offgases ..... Apr. 83
Polyolefins review 1997 ..... May 3-I
What are future petrochemical feedstocks? ..... May 85
How will Southeast Asian petrochemicals impact the HPI? ..... May 91
Make boiler feedwater with lower risks ..... Aug. 57
Improve alloy selection for ammonia furnaces ..... Oct. 93

OXYGENATES

Petrochemical Processes '97 ..... Mar. 103
Methanol: a global chemical undergoing phenomenal change ..... May 11-I
What are future petrochemical feedstocks? ..... May 85

P

PIPING

Solve valve noise and cavitation problems ..... Mar. 45
Minimize FCCU startup problems ..... Jun. 67
Designing and maintaining plant piping and valve systems ..... Jul. 59
Evaluating heat tracing ..... Sep. 75
Prevent piping failures ..... Oct. 47
Improve alloy selection for ammonia furnaces ..... Oct. 93
Line sizing for gravity flow piping ..... Nov. 99
Simple method determines f low regime for friction factor calculations ..... Dec. 71

POLYMERIZATION

Petrochemical Processes '97 ..... Mar. 103
Polyolefins review 1997 ..... May 3-I
How will Southeast Asian petrochemicals impact the HPI? ..... May 91

PUMPS

Experience with pump gas seals ..... Jan. 47
Turbogear bearing analysis ..... Apr. 93
Control valve fugitive emissions ..... Aug. 45
Pump seal standard API 682 has deficiencies ..... Aug. 49

R

REFORMULATION

New refinery stream profiles available .. Aug. 63

RESIDUES

Prevent preflash drum foaming ..... May 141

ROTATING EQUIPMENT

Minimize capital investment for refinery revamps ..... Jan. 103
Consider trigeneration techniques for process plants ..... Jul. 91
Pump seal standard API 682 has deficiencies ..... Aug. 49

S

SALTS

Effect of heat stable salts on MDEA solution corrosivity, Part 2 ..... Apr. 65

SCHEDULING

Plan ahead for a smooth project hand over to operations ..... Jan. 135
Teamwork increases fractionation capacity cost-effectively ..... Oct. 121
Yukong sets benchmarks for best practices ..... Oct. 126-C
Hydrocarbon value chain: now electricity ..... Nov. 118-C
Monitor contractor performance ..... Nov. 137
Engineering standards and EQC—why bother? ..... Dec. 44

SEALS

Pump seal standard API 682 has deficiencies ..... Aug. 49

SOFTWARE

Advanced control and information systems '97 ..... Sep. 87
Integrate empirical and physical modeling ..... Oct. 105
Decision-making and modeling in petroleum refining ..... Nov. 77
Combinatorial optimization maximizes profits ..... Nov. 103
Achieve sustained business benefits from rigorous offline process models ..... Dec. 57
Latest advances in 3-D plant engineering software ..... Dec. 63

SULFUR

Petrochemical Processes '97 ..... Mar. 103
Improve operations and enhance refinery sulfur recovery ..... Apr. 57
Analyze trace sulfur compounds in hydrocarbon gas streams ..... Apr. 73

T

TRAINING

Total quality management ..... Dec. 53

TREATING

Trends in catalysis research to meet future refining needs ..... Feb. 45
Refiner options for converting and utilizing heavy fuel oil ..... Feb. 57
Assess hydrocracker performance using a short-cut method ..... Mar. 79
Improve operations and enhance refinery sulfur recovery ..... Apr. 57
Economically recover olefins from FCC offgases ..... Apr. 83
Make boiler feedwater with lower risks ..... Aug. 57
Treat LPGs with amines ..... Sep. 49
Why caustic addition is bad for amine systems ..... Oct. 115

U

UTILITIES

Lessons learned from troubleshooting steam generators ..... May 155
Optimize wastewater operations ..... Jun. 77
Understand the basics of packaged steam generators ..... Jul. 85

Consider trigeneration techniques for process plants ..... Jul. 91
Improve flare management ..... Jul. 105
Make boiler feedwater with lower risks ..... Aug. 57
Outsource water/wastewater management ..... Aug. 87

V

VACUUM

Understand real-world problems of vacuum ejector performance ..... Nov. 63
Deep cut vacuum tower processing provides major incentives ..... Nov. 83

VALVES

Solve valve noise and cavitation problems ..... Mar. 45
Improve VOC emission predictions ..... Apr. 119
Reduce storage tank emissions ..... May 121
How control valves impact process optimization ..... Jun. 53
Minimize FCCU startup problems ..... Jun. 67
Designing and maintaining plant piping and valve systems ..... Jul. 59
Improve flare management ..... Jul. 105
Control valve fugitive emissions ..... Aug. 45
What is your corporate perspective on loss prevention? ..... Oct. 69
Fire-safe packing curbs emissions ..... Oct. 83
Simple method determines flow regime for friction factor calculations ..... Dec. 71
Consider two-phase relief for liquid blockage of flash drums ..... Dec. 76

VESSELS

Minimize capital investment for refinery revamps ..... Jan. 103
Avoid operating problems in air-cooled heat exchangers ..... Mar. 69
Effect of heat stable salts on MDEA solution corrosivity, Part 2 ..... Apr. 65
Improve VOC emission predictions ..... Apr. 119
Reduce storage tank emissions ..... May 121
Prevent preflash drum foaming ..... May 141
Lessons learned from troubleshooting steam generators ..... May 155
Minimize FCCU startup problems ..... Jun. 67
Optimize fired heater operations to save money ..... Jun. 97
Design pyrolysis heaters using CFD models ..... Jul. 79
Understand the basics of packaged steam generators ..... Jul. 85
Consider trigeneration techniques for process plants ..... Jul. 91
Improve flare management ..... Jul. 105
Does your distillation simulation reflect the real world? ..... Aug. 103
Reduce the impact of coke fines on delayed cokers ..... Aug. 111
Treat LPGs with amines ..... Sep. 49
Deep cut vacuum tower processing provides major incentives ..... Nov. 83
Throughput enhancement & process tube temperature stabilization ..... Nov. 91
Consider two-phase relief for liquid blockage of flash drums ..... Dec. 76
Barrel calorimeters and computer solve boiler circulation problem ..... Dec. 79

W

WASTEWATER

Minimize environmental impacts when replacing underground pipe ..... Feb. 85
